The Breast Cancer Research Foundation (BCRF) is committed to being the end of breast cancer by advancing the world's most promising research. Founded by Evelyn H. Lauder in 1993, BCRF-funded investigators have been deeply involved in every major breakthrough in breast cancer prevention, diagnosis, treatment and survivorship. BCRF is proud to support stellar research in the Boston area. This year, 34 of BCRF's 250 investigators hail from New England's premier academic medical institutions. Boston is a center of scientific excellence and BCRF has awarded more than \$7 million in grants this year and over \$65 million cumulatively to lifesaving research in the region. By investing 91 cents of every dollar directly to its mission, BCRF remains one of the nation's most fiscally responsible nonprofits. BCRF is the only breast cancer organization in the US with an "A+" from CharityWatch and has been awarded Charity Navigator's highest rating of four stars 14 times since 2002.
